Change in Admission Requirements to IUPUC Honors Program

Approval of the creation of an IUPUC Honors Program by Faculty Senate occurred on 3/16/2012. On 9/21/12, Senate approved an edit to the admission criteria raising the cumulative high school GPA required of entering beginners from 3.0 to 3.5, attributing the change to a typographical error. After that vote, IUPUI approved the establishment of an honors program at IUPUC with the stipulation that our program admission requirements match those of their program. The Honors Program Faculty Advisory Council is requesting Senate to review and accept two revisions to the admission criteria to mirror those of IUPUI.

- Increase the high school GPA requirement for entering beginning students from the 3.5 previously approved to 3.7 in accordance with IUPUI standards.
- Lower the number of credits required for students to be considered under the alternative admission requirements from 24 non-remedial credits to 12 non-remedial credits. Again, this is in accordance with the requirements used at IUPUI.
